Becker's Hospital Review Names 100 Great Community Hospitals for 2016

Shelbyville, IN — Major Hospital is pleased to announce that it has been chosen as a Top 100 Hospital in America by *Becker's Hospital Review*.

Becker's has published a version of this list annually since 2011. This is the fifth year the list has included 100 hospitals. For the purposes of this list, *Becker's* defines a "community hospital" as one with fewer than 550 beds. The hospitals on this list are spread across the country, some not far from major metro areas and some in rural communities. Regardless of location or whether they are affiliated with a major system, these hospitals are vital parts of their respective communities.

The *Becker's* editorial team selects hospitals for inclusion based on rankings and awards from organizations including iVantage Health Analytics, Truven Health Analytics, Healthgrades, CareChex, the American Nurses Credentialing Center and the Leapfrog Group. Included organizations have earned recognition from one or more of these organizations.

Major Hospital President and CEO Jack Horner stated: "We are very pleased to once again be recognized by yet another national healthcare publication as a Top 100 Hospital in America. All of our providers including: physicians, nurses, and clinical staff have worked very hard to be the best in their respective fields. This recognition from *Becker's Hospital Review* is an excellent example which confirms that our people excel at giving quality care to our patients. It should also be noted that Major Hospital is one of only four Indiana hospitals to receive this recognition."

Gene Jones, President of the Major Health Partners Board of Directors congratulated the Major Hospital staff on receiving this prestigious recognition. "Results like these come from a staff committed to quality and patient safety. Their commitment to excellence will continue as we move to the new MHP Medical Center in January of 2017 and take advantage of this new world class facility and its state of the art technologies."

The full "100 Great Community Hospitals 2016" online list includes individual profiles of all organizations.
