

The New
MHP Medical Center:
*Providing a healthier future
for our community.*

MHP[™]
MAJOR HEALTH
PARTNERS

One location
that provides all
your healthcare
needs.

*A 350,000 sq. ft. building
that will be home to
57 physicians and 934
employees. Patients will have
their doctors appointment,
lab work, and imaging all
completed in one location.*

All your healthcare needs on one campus.

Tired of traveling from one side of town to another for your doctor's appointment, lab work or more? The new Major Hospital will be home to 30 Primary Care Physicians and 27 Specialists.

56 private inpatient rooms

Each room has been designed to provide the patient with new treatment technologies and to promote shorter patient stays - which equals a cost savings to the patient. Also included in the new hospital are 38 outpatient rooms in our newly designed Ambulatory Care Center.

Why do we need a new hospital?

The current facilities at Major Hospital do not provide enough space to provide the estimated increase in patients in the future years. Not only is parking an issue, but building maintenance will be costly. It came down to a decision to either invest money in our current building (and become locked in a building that can no longer be expanded) or invest in the future of healthcare at a new location.
